

Trail

- A two-way facility that is physically separated from motor vehicle traffic.
- Used by bicyclists, pedestrians, and other non-motorized users.
- Typically it is located in an independent right-of-way.

Separated Bike Lane

- A bicycle-only facility that is physically separated from motor vehicle traffic and distinct from the sidewalk.
- Can be one-way or two-way.

Sidepath

- A two-way, multi-use path, adjacent to the roadway, serving both pedestrians and cyclists.
- Essentially a wide sidewalk.

On-Street Bike Facility

- Provides exclusive space for bicyclists in the roadway; designated by pavement markings and signage.
- Buffered bike lanes (shown) increase comfort by adding a painted buffer to a standard bike lane.
